STANDARD FREESTANDING VANITY

SIZES AND CONFIGURATIONS

This depicts standard vanity sizes and configurations which may not be available across all five of our lines.

Other sizes/configurations may be available within different cabinet lines. Vanities are built in increments of 3" and may either be 18" or 21" deep, and 31 1/2" or 34 1/2" high. Pieces of wood called "fillers" are used to fill in spaces that standard sizes cannot accommodate and to allow for wall and/or door clearances. Most freestanding vanities can be turned into furniture style by voiding the toe kick and adding legs.
